

Trinity Church presents:

# How to Green Your Air Travel

Erin Craig has spent most of her 30+ year professional career working on climate change and other environmental challenges. Today she leads the consulting team at 3Degrees, helping the world's largest and most successful companies bring more renewable energy into the world. She has a BS in Geophysics from Stanford, and an MS in Technology and Policy from MIT. She's lived on the mid-peninsula for more than 30 years.

Flying a few times a year generates so much CO<sub>2</sub> that it can easily wipe out heroic reductions we make doing things like driving an EV or installing solar.

For those who must fly, there are **offsets**. What is a **carbon offset**? How much do they cost and where do I buy them?

These are the questions that will be answered by carbon offset expert, **Erin Craig of 3 Degrees**, who will speak at Trinity on **Sunday, May 19th**.

Join us in Angus Hall, following the 10am service for this expert talk and discussion.
